## WATER CONSERVATION POLICY

Water conservation strategies are vital for sustainability and responsible resource management. Devaswom Board College Thalayolaparambu has implemented effective strategies for efficient management of water.

### Policy statement

Campus-wide awareness programmes shall address the problem of water scarcity and emphasise the role of students in the need of water conservation to the society. There is a need of consistent implementation of conservation measures and department wise instructions shall be given for monitoring the use of water by all.

### Objectives

- To conduct awareness programmes among students, faculty, and staff about the importance of water conservation
- To provide tips for reducing water consumption in daily activities.
- To engage students in water conservation initiatives
- To continue partnership with water authority for getting continuous water supply
- To conserve rain water using a rainwater harvesting system

### Strategies adopted

- Preparation and maintenance of a rainwater harvesting system to capture and store water without expending much energy or time.
- Water harvested can be effectively utilised.
- Better landscaping practices that require less maintenance
- Awareness programmes on frugal usage of water and prevention of water damage

- Conduct awareness programmes on World Environment Day, Earth Day and World Water Day on the necessity of water conservation.
- Regularly monitoring the taps and flush for leak detection and carry out repairs to prevent water wastage.
